

## ~Sample Live Green Messages to insert into Emails~

 **Live Green by programming your thermostat, burning cleanly, keeping your car maintained, using green cleaning products and more. Go to [SpokaneCleanAir.org](http://SpokaneCleanAir.org) for more information on air quality and reducing air pollution!**

### Your Home

- ✓ Programming your thermostat is a terrific way to save money and energy—all helping reduce air pollution.
- ✓ Burning cleanly—using clean, dry wood minimizes the potential of irritants on our lungs.
- ✓ Using green cleaning products means healthier air and a healthier you!

### Your Car

- ✓ Your car loves a tune up! Proper pressure in your tires can reduce fuel consumption.
- ✓ A heavy load makes the engine work hard—remove unnecessary weight from your trunk.
- ✓ A well-maintained vehicle produces fewer pollutants and saves you money!

### Your Commute

- ✓ Bring your own mug.
- ✓ Bring your own water bottle and refill it—over and over again.
- ✓ Pack your lunch.
- ✓ Reuse plastic plates and utensils. Throw them in the dishwasher top shelf and they'll clean right up.
