

Try picking Someone up before you go out.

Share a ride with a friend. It's nice to have a co-pilot, plus you'll save money

and the air. Ride sharing is a great way to make driving more enjoyable, whether you're going out on the town or going to work. You'll save money, too. Sharing a ride with just one person can cut your commuting costs in half. And if all drivers doubled up it would cut traffic congestion and pollution substantially. That could eliminate millions of pounds of pollutants from the air each year. So keep it up because –

It all adds up to cleaner air
